1   How to run

1.1   Before Start :

If you want to run our project and evaluate, what we have done. You have to install the following softwars-

- Python 3.6.3 [How to install]

- Anaconda Navigator 1.6.11 [How to install]

1.2   After installation :

After completing installation of **Python 3.6.3** and **Anaconda Navigator 1.6.11** you need to take the following steps:

1. Run **Anaconda Navigator**

2. Run **Spyder**

3. Open the file **AsusLaptopPricing.py** using **Spyder**.

4. Run the code.

N.B. Keep "**AsusLaptopPricing.py**" & "**Price.csv**" both files in a same folder.
